layout, photo retouching, creating mock-ups and presentations for packagings.

Shanghai University of Science and Engineering Fashion Design and Engineering (Bachelor) 2008.09 - 2012.06

## PROJECT

### 1 Personal webpage

- 1 Designed all the UI and the templates of the whole website.
- 2 Use **HTML & CSS** to create the webpage. ( including **CSS media queries** for mobile responsiveness, **CSS animation** for the dynamic effects, **CSS font-face** to implement some special fonts)
- 3 Tested front-end code in multiple browsers to ensure **cross-browser** compatability.
- 4 The project uses **jQuery** to manipulate **DOM** elements.(such as Go-top, Stickup and other **components**)

### 2 Sinanews Project

- 1 At the bottom of the page to set up a span ( and set the property of this span visibility), when I can not see it, loading the data (**AJAX** sent to the background), then add the data to the page, and use the waterfall layout to put all the elements in order. By using the Deferred method in jQuery to let the picture completely loaded.

### 3 CSS3 Carousel

- 1 Use **CSS3 animation** to produce a dissolve effect of the image carousel. Just located the image and confirmed the timeline of dissolve effect by animation in **CSS3**. Make sure each picture's play time and how much time to complete a cycle.

### 4 Ksudi UI Design

- 1 Design the interface of the delivery manager application both in Android and IOS version, customer management system.

### 5 Pinpin Market UI Design

- 1 Design the interface of the delivery manager application both in Android and IOS version.
